EXAMINATION SERVICES

Examination Services that make a difference...

Bridgeway has a proven track record as a specialist supplier of structural examinations within the rail industry.

WHAT WE CAN DO

Using our fully co-ordinated teams, we are able to carry out various types of structural and tunnel examinations, including the use of rail mounted MEWPS.

We utilise bespoke temporary access solutions to allow asset examinations, surveys and repairs to be undertaken.

We are able to offer all of the following:

- Qualified Engineer Led Structural Inspections and production of engineering reports for:

- Bridges
- Tunnels
- Masts
- Towers
- Retaining walls
- Culverts & pipes
- Signal gantries
- OHLE masts

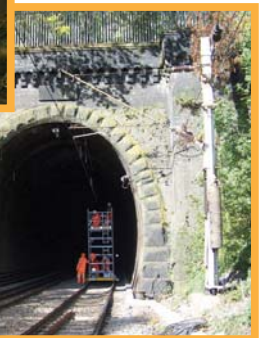

- Emergency Call-Out Response
- Confined Space Examinations
- Tunnel access / MEWP's
- Scaffold towers / RRV mounted inspections

FURTHER INFORMATION

All our examiners are competence assessed in accordance with Network Rail standards by our qualified assessors and we are Link Up approved in many categories. We have dedicated examination teams that are able to provide an array of examination services and temporary access solutions.

The examinations services team comprises the following dedicated staff, which can be supplemented on a project by project basis

- Fully qualified bridge examiners (STE/04)
- Assistant examiners
- Structural engineers (STE/02)
- PASMA trained operatives
- IRATA rope access operatives
- HSE trained divers (STE/07)
- Confined space trained examiners
